The most important for us are children and their needs !

Our main purpose is to educate our students to be sensible men and women, aware of differences between people. We want them to be conscious of other people needs. Therefore our school can attend both healthy children and those with disabilities.

Our aims:

- To enable the special needs students to develop their abilities as far as they can.*

•To discover and develop our students' passions and gifts for.....

• *we teach how to give and take what is the best ...*

• To prepare our students for living in modern society...

• To educate them to be local and national patriots. ..

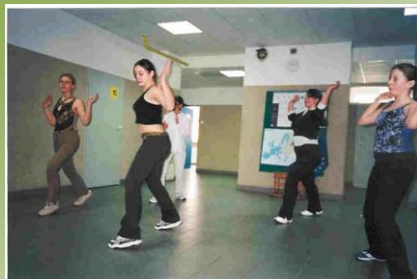

Among other things we execute those aims realizing many Projects:

- *School Projects*
- *International Projects*

- *Chocolate*

• *Healthy lifestyle*
